## Tech Stack

**Frontend:** React, TypeScript, Vite, TanStack Router, TanStack Query, Tailwind CSS v4, Radix UI, Socket.IO

**Backend:** Node.js, MongoDB

**Tools:** Git, GitHub

## Professional Experience

### React / React Native / Next.js Developer – HVG Technologies

Dec 2024 – Present

**Projects:** Solid Health, Arjun Project, EV Charging Web, Syed POC, OWCRM

- Developed SolidHealth.ai for Web and Mobile, an advanced healthcare platform providing AI-powered tools and personalized care management.
- Developed a stock market web application using Next.js and Redux for real-time data visualization.
- Built a platform to manage EV charging stations with booking and payment features for web and mobile.
- Delivered flexible and interactive UI components across web and mobile platforms.
- Developed proof-of-concept apps (Syed POC) with reusable components for rapid prototyping.

### React / React Native Developer – CoderKube

Aug 2024 – Nov 2024

**Projects:** Heu App, Heu Admin, Transectra

- Built responsive UIs for mobile and web using React Native, React.js, Tailwind CSS, and ReCharts.
- Integrated REST APIs with multilingual support and Google Authentication.
- Developed the Heu App for Web, Android, and iOS: card and membership rewards platform.
- Built Transectra: premium diamond marketplace web platform with scalable UI and API-driven data rendering.
- Collaborated with cross-functional teams for feature delivery.

### React Developer – Dot3 Solutions

Mar 2023 – Jul 2024

**Projects:** The Fat Wallet, CompleteCSM, MadConnec

- Developed The Fat Wallet, a rewards platform delivering exclusive benefits to users.
- Built CompleteCSM, a customer success management platform improving user retention.
- Developed MadConnect, a data delivery hub for MarTech platforms with enterprise-grade UI.
- Integrated GraphQL and REST APIs with Redux for complex data flows.
- Focused on scalable architecture, performance, and clean UI/UX.
